

Excerpts from **autohifi** test report:

The midwoofer shows its thick magnet rightfully, because it pushes levels absolute fully.

The **AUDIO SYSTEM** looksvery noble... and features a flanged on volume.

The **AUDIO SYSTEM** crossover extends seven high-pass filters, eightfold adjustable tweeter levels and three different slopes in the low-pass circuit.

The **AUDIO SYSTEM** obtained the highest maximum bass level... is on the average 4 to 5 dB more loud than the remaining test candidates.

From timing harmonized the mid and the high range however well.

autohifi test result:

- + high maximum bass level
- + flexible crossover
- + responding tweeter
