

DSP 6To8 ACCESSORIES

AMAS (Advanced Multi Audio Streaming) Module

- SP-Dif Multi Board is required
- It supports A2DP in the high-resolution EDR specification by any source like mobiles/pads/tabs with iOS/Android or....
- Data transfer also of uncompressed files and directly into the digital section of the DSP, so the best possible signal flow for absolute High-End Sound
- 3 simultaneous connections (control/handsfree-set/audio), but only one audio source
- Bit rate up to 2.1 Mbit/sec
- Supported codes: SBC, MP3, AAC, Flac, Loss-Less, Wave
- Including an antenna extension cable if the 6to8 location is e.g. in a closed trunk
